Improving Test Scores

Mr. Kane

If you are not satisfied with your test score I do offer a way for you to improve it. You can use this document to analyze your mistakes and get additional points. For each question you analyze you can reclaim 33% of the original points for the question. Since tests cannot be taken out of the classroom, part of this work must be completed in my room.

Make sure your analysis is complete and thorough.  
Write legibly (I need to be able to read it!)
